

Advanced Unified Communications
Specialized Partner

04/21/2010

Lukas Auer
ECONIS AG
Neumattstrasse 7
Dietikon Zuerich 8953
Switzerland

Dear Lukas Auer,

Congratulations on becoming a Cisco® Advanced Unified Communications Specialized Partner.

As a Cisco Specialized Partner, you are recognized for demonstrating your technical knowledge and the ability to deliver services related to the latest Cisco technologies. Achieving specialization validates your expertise in the specific technologies necessary to implement the more advanced solutions customers are demanding, and can help you differentiate your solutions and services from competitors, pursue new markets, and increase credibility with your customers.

As a Cisco Advanced Unified Communications Specialized Partner, you play an important part in delivering end-to-end advanced unified communications solutions that help your customers work smarter and do more with less.

We have provided a customized certificate that identifies your expertise in advanced unified communications and can be displayed in your place of business. You may order a customized plaque or additional certificates for a fee by visiting www.cisco.com/go/partnerkits.

You also have access to the online Partner Sales and Marketing Kit at www.cisco.com/go/partnerkits, which provides links and information to the many benefits you receive for participating in the Cisco Channel Partner Program. Included in the kit are:

- Partner resources: Materials to help you promote your business, including brochures, flyers, and PowerPoint slides.
- Partner enablement tools: Tools and programs to help you promote your business, including messaging guides, training resources, and a Quick Reference Guide to Partner Enablement.

We hope the contents of this kit prove to be useful in facilitating your marketing efforts and in strengthening your partnership with Cisco. We value the level of commitment you have demonstrated and look forward to continuing a successful partnership.

Sincerely,

Surinder Brar
Senior Director,
Cisco Worldwide Channels
